**FOR IMMEDIATE RELEASE**  
**Hayward, California**

**Multi-Award Winning Hybrid Mobile POS at RSPA 2015**  
**Tablet Mobility with Full POS Functionality**

Posiflex will showcase its newly patented, multi-award winning mobile tablet [MT4008](#) at RSPA's RetailNOW® 2015 (Booth 425). The Posiflex MT4008 tablet is a ground-breaking, fully modular hybrid system designed to provide mobile flexibility with powerful stationary POS functionality. MT4008 was internationally recognized by winning the 2015 Red Dot Award for Product Design, besting 4,928 entries from 56 countries. At Computex 2015, the second largest international IT exhibition in the world, MT4008 won awards for both Best Design and Design & Innovation.

The MT4008 system composes of an 8" tablet, optional 2D scanner with a pistol grip and extended-life battery, and printer docking station. Andre Nataf, Director of Business Development for Digital Dining, notes, "It's not enough that you simply replicate fixed POS capabilities on a mobile device. You need a hybrid system that bridges the gap between fixed and mobile POS. The MT4008 allows our customers to do both, so they can focus on the customer rather than the transaction."

With ASI's (Action Systems Inc.) certification, Restaurant Manager resellers now have a powerful Windows® mobility offering with the MT4008, which is streamlined to grow your business. Olin Ford, Southern Oregon Business, an ASI dealer, has deployed MT4008 in drive-through concepts and traditional table service locations. "The MT4008 wireless printer docking station is quite unique. It's handy to take the tablet off at peak times and take orders on the go, then put it back on the dock when traffic slows to use as a POS terminal. I like the flexibility of the MT technology, and the flexibility it gives to my customers."

Retail clerks using the MT4008 with the optional pistol grip 2D scanner can operate well past an 8-hour shift with its removable battery for line busting, inventory or ticket taking. Or the tablet alone is ideal for servers on the go, as the handstrap and MSR are standard features. The MT4008, when docked, includes serial, USB, LAN, and cash drawer ports.

Mike Hamm, COO at Focus POS, concludes, "Traditional POS is evolving, and the MT4008 is an example of a new approach that will help it reach a new level."
