

Posiflex debuts POS tablet, terminal and kiosk at NRF 2017

New kiosk, MT4308 tablet, XT5317 terminal

HAYWARD, Calif. (Jan 10, 2017) -- [Posiflex](#) debuts three new retail POS products at the National Retail Federation (NRF) Big Show 2017 - self service kiosks, patented and award winning tablet and 17" maximum performance touch terminal.

Posiflex will showcase its new kiosk line for hospitality and retail in the NRF booth [#3071](#) and in [KIOSK Information System's \(KIOSK\) booth #3805](#). The new **Stellar Kiosk** platform is the first joint product collaboration since the Q3-2016 Posiflex acquisition of KIOSK. This model features several Posiflex components, including a 21.5" All-in-One PC/LCD providing a minimalist bezel and sophisticated interface. The enclosure is available as a pedestal or countertop and can be readily customized with additions of EMV payment devices, multiple printers, scanners, and more.

Tom Weaver, KIOSK CEO, notes "This new model is an outstanding example of combined synergies between Posiflex and KIOSK. Merging Posiflex's extensive component design expertise and sourcing efficiency with KIOSK's solution design, manufacturing, and support capabilities equates to an exceptionally competitive total solution. Our teams have co-created a sleek and customizable platform that addresses the form, features, and price efficiencies retailers are requesting."

Additional Posiflex product introductions include:

- The new **MT4308 8" touch screen tablet** joins the MT tablet series and adds Corning Gorilla Glass touch screen for increased durability running Windows 10. A US patent has been issued on the MT series for engineering innovation by transforming from a tablet to a bar code reader, then an all-in-one POS. The MT series is ideal for line-busting, inventory management, mobile payment and customer engagement. The MT Series has won three international design awards. Delivery soon.
- Posiflex adds the new **XT5317** to its XT Series of sleek touch screen terminals for retail and hospitality. The XT5317 is a 17-inch projective capacitive touch terminal with options for three powerful processors, Powered USB, backup battery, and /or eight-port hub integrated inside the base for a clutter- free counter.

Stop by our booths (Posiflex - [#3071](#), KIOSK - [#3805](#)) for a closer look.

About Posiflex

Posiflex since 1989 has provided proven and highly reliable POS terminals to retail and hospitality with maximum uptime. Posiflex POS purpose built terminals can run virtually any Window's software. Posiflex designs, engineers and manufactures all its own terminals, tablets and peripherals in Taiwan. [For more information](#)

The Posiflex MT4308 tablet with 2D scanner pistol grip and extended-life battery in handle can operate well past an 8-hour shift with its removable battery for line busting, inventory or ticket taking. Or the tablet alone is ideal for servers or sales associates on the go. The tablet, or tablet with the pistol grip can be docked into a base with 3" printer for full traditional POS terminal use.

In 2016, Posiflex acquired KIOSK to combine superior kiosk design with highly durable Posiflex transaction components. The Stellar series is available as a free standing or countertop. The enclosure can be customized as needed and is ADA compliant for self-service access to all your customers.
