

**POSIFLEX CR4210C model cash drawer now includes Embedded Powder Coat Anti-Scratch Finish**

An enhanced version of the CR4210C cash drawer is currently being shipped to our partners with a new anti-scratch paint. In a continuous effort to improve its products POSIFLEX have implemented this enhancement in order to provide a more durable finish to this model cash drawer. This will better protect the surface from normal wear and tear that often results in discoloring or permanent scratches, thereby extending the life of the drawer.
