

New Hybrid POS - HT4200 series

Design. The Hybrid system includes an Elo Accutouch panel and/or keyboard for order entry. The LCD panel offers multiple tilt and viewing angles for ergonomic comfort. The compact Hybrid system includes screw-less and spill-proof architecture, by design, to withstand the rigors of daily usage in the harshest environment. Cable management allows for cleanliness and added reliability. A PCI card slot is available for added functionality.

Function. Utilizing an Intel Celeron 2.0 GHz CPU and 40GB EIDE HDD, the Hybrid accommodates up to 2GB of DDR memory and supports Microsoft Windows 2000 or XP Professional. Power guard features include a software controlled power switch and optional internal UPS battery to allow proper shutdown of the system thereby protecting valuable data from corruption. LED indicators provide quick reference to check the status of power, standby-mode, or battery usage. The Hybrid offers plenty of ports to accommodate any application: three USB; four serial; parallel; cash drawer; LAN; VGA; audio; PS2 keyboard/mouse ports and PCI card slot. In order to meet different application requirements, a variety of unique attachments and peripherals are available. A combination MSR/ DigitalPersona U.are.U Fingerprint reader attachment (SD300), integrated pole display (PD2601), programmable/QWERTY keyboard (KB6600), thermal receipt printer (AURA7000) and cash drawer (CR4210 series).

Value-Added Services. The Hybrid POS includes a standard 3-year manufacturer's warranty. When additional services are required, Posiflex offers a Rapid Exchange Service program with extended warranty options that include Next-Day On-site Service (includes on-site technician) or Next-Day Customer Assist (without on-site technician).

"The Hybrid POS system offers retailers an industry hardened and compact high-performance POS terminal, with rich features, at a very reasonable price point. With dual interface capability using a touch screen or keyboard, it will appeal to a broad range of POS professionals serving a variety of POS applications," said Scott Johnston, V.P. of Sales.

Please contact a POSIFLEX Regional Sales Manager for more information on the Hybrid POS system.
