Health Care Touch Screen Solutions

Posiflex is a designer and manufacturer of touch terminals. With over 30 patents and over 25 years of engineering innovation, Posiflex has been developing touch screen terminals hardened against heat, dust and liquid. Posiflex terminals meet the high standards demanded by healthcare environments in desktop, wall mount and free-standing kiosk applications.

Healthcare Provider Benefits

- Reduce administrative/overhead costs
- Increased employee efficiency
- Improved quality of care
- Decreased wait times
- Improve revenue visibility and management
- HIPAA and ADA compliance
- Electronic Medical Records

Touch Screen Patient Services Self Service Admissions

- Appointment check-in and scheduling
- Secure patient identification and record access
- Real time eligibility check
- Consent form viewing and e-signature
- Outstanding balance and co-pay collection
- Directory and way finding

Ordering

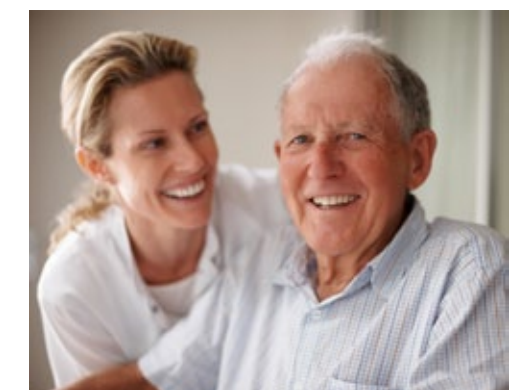

- Prescription refill ordering

Information

- Integrated multimedia patient education
- Extensive database of medications, treatments and symptoms
- Secure access to approved websites

Patient Benefits

- Reduced wait time
- Accommodates patient diversity with multi-language capabilities
- Easy to use touch screen technology
- Improvement in patient privacy
